

Session IV: Addressing Challenges at the local level

Thematic Session 3:

Multipurpose use of shared lake basins water resources

Question 1

- How can we identify the main drivers of change for a shared lake in view of its sustainable management? (e.g. Navigation , Hydropower, Tourism, Agriculture, Fisheries ...)

Question 2

- Is it possible to identify the key driver of change in a given basin and structure its sustainable development around it?

- What in the case that the key driver (i.e. economic activity) is different in the riparian countries?
- What in the case when the legislative basis is different in the riparian countries?

Question 3

How can we involve the stakeholders from different sectors to agree on a common vision in order to maximise benefits (financial and social) in the long term?

- Examples from different basins (positive and negative)
